

MACHINE IQ

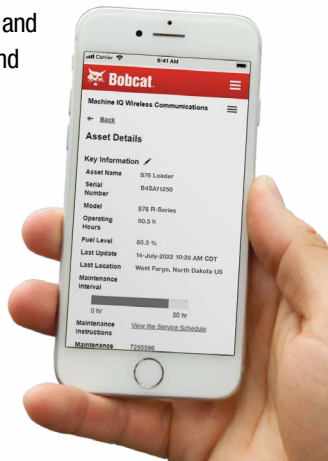

WIRELESS COMMUNICATIONS

BOBCAT® MACHINE IQ connects you to your machine's information at any time, anywhere and from any device. Using Machine IQ, you can check the health of your machines and remotely track information that enhances maintenance, security and performance.

How does Machine IQ benefit me?

Your machine information is made available to you via your Bobcat Owner Portal account at my.Bobcat.com, or via the Machine IQ mobile app. This information makes it easier to manage, maintain and track your fleet.

- **Planned and Unplanned Maintenance:** Receive critical notifications to manage maintenance and maximize machine uptime.
- **Machine Security:** Prevent theft and machine misuse with geofence and curfew capabilities.
- **Reporting and Analytics:** Review utilization reports to optimize performance.

Don't forget to subscribe to email notifications and alerts.

When you upgrade to the Health and Security subscription, you receive access to email alerts, in-portal notifications and mobile app alerts that help you manage your machine's health and security:

- Fault code notifications
- Maintenance reminders
- Geofence breaches
- Curfew breaches

HOW DO I GET CONNECTED?

Machine IQ is accessible via your Bobcat Owner Portal account. To sign up, visit my.Bobcat.com

1. Create your Owner Portal company account.
2. Have your company account created? Great! Now simply use the "claim my machine" feature that allows you to request association of your Bobcat connected machine to your Owner Portal account.

OR

Contact your dealer and tell them your email address, serial number and what subscription package you would like. They will take care of the rest.

DOWNLOAD THE MACHINE IQ MOBILE APP.

Access all your Machine IQ information at my.Bobcat.com or by downloading the Machine IQ mobile app.

IOS APP STORE

GOOGLE PLAY

Download now by using your mobile device camera to scan the QR code applicable for your mobile device.

BOBCAT MACHINE IQ SUBSCRIPTIONS

Machine IQ Basics is included for the first three years on all Bobcat connected machines. If you wish to upgrade your account to include more features, the Machine IQ Health and Security package is a great solution. Contact your Bobcat dealer for pricing and subscription details.

Machine IQ Basics Subscription

The Machine IQ Basics subscription provides access to basic machine information. Use this information as a foundation for effective fleet management.

GPS Location and History

Track your machine's location and history on the map, and access an address or latitude and longitude.

Operating Hours

Time is money, so keep track of how many hours your engines have been running.

Fuel Level

Remotely check the fuel level on your machine to manage uptime.

Maintenance Interval Tracking

Stay on top of maintenance by tracking your assets' regular and custom maintenance cycles and stay prepared with instructions for each interval.

Ask your dealer if your Bobcat machine comes with Machine IQ factory-installed, or how you can get aftermarket Machine IQ connection kits to purchase for your machine.

Machine IQ Health and Security Subscription

Upgrade your subscription to the Health and Security package for more robust machine information to enhance your machine's health and security, with the convenience of managing all notifications right within the Owner Portal.

Basics Information Included

The Health and Security package includes the features and benefits that the Basics package offers, such as GPS location and history, operating hours, live fuel levels, and maintenance interval tracking.

Fault Code Notifications and Troubleshooting

When your machine generates a fault code, Bobcat takes the guesswork out of diagnosing the issue. When you sign up for fault code notifications, you will receive an email and notification in the Owner Portal* with step-by-step troubleshooting information to get you back up and running.

Geofence Creation and Breach Notifications

Protect your investments by setting up customized boundaries that identify where your machine should and should not be operated, and receive an alert* when your machine leaves that designated area.

Curfew Creation and Breach Notifications

Set custom working days and hours to receive alerts* if the machine's engine is started outside your defined timeline.

Utilization Reports

Work smarter and get more out of your machine by enhancing the efficiency of your equipment with custom reports on working hours, idle hours and fuel usage by day or hour.

*For mobile app users, receive a notification right to your phone.
